

Amendments to the Abstract:

In the English translation document, please add the abstract at page 10 line 1, as follows:

--ABSTRACT

A method for automatically initiating a call, according to which the existing connections from a first user of a telecommunication network to other users are detected and are evaluated regarding the statistical regularities thereof while calls are initiated to the other users based on the identified statistical regularities is provided.. Particularly service-based companies to inform their clients in a targeted manner is allowed.--
